

YOUR DIGITAL WORKSPACE

HEALTH ASSESSMENT

Taking in all the technology health factors from work style to function, resource and accessibility, we'll work together with you to identify any problem areas so you can build on your current technology position. You'll emerge stronger from it all, armed with the knowledge and actionable insights to create a happier, healthier, better connected team.

We'll start with the heart of your company - your people.

65% of business leaders agree that more control over how, where and when we work is better for everyone

- PWC 2021

We use employee workstyles to understand the make up of your organisation. We'll find out what tools, applications and devices each team member needs to grow and fuel their fire.

We'll analyse everything from apps to collaboration tools to ensure your team can work in the office, from home or anywhere else. We'll recommend the best solution, from Daas to Microsoft assessment services.

We'll simplify and rationalise your client devices, software, connectivity & cloud infrastructure. Our ITAM service will shine a light on your technical resources.

Why Softcat?

At Softcat, putting people first is in our DNA and we'll work with you to take your digital workspace to the next level. That's because we put you and your people first to find a solution that'll really power productivity, job satisfaction and wellbeing. As the workplace changes and so does your business,

we team up with you to work out what will empower employees while smashing your goals. Our experience, expertise and longstanding relationships with key partners, outlined below, means you'll be able to take new technologies in your stride and stay ahead of the curve.
